CRITICAL TRIAGE GATE

**Emergency Protocol
Warning**

STAT
108

Immediate attention required: Some acute physiological emergencies mandate immediate paramedic dispatch or ER presentation rather than scheduled digital referrals.

CLINICAL RED FLAG INDICATORS

If you or anyone nearby experiences any of the following time-critical acute symptoms:

Severe Chest Pain: Radiating crushing pressure to the left jaw, neck, shoulder, or arm.

Severe Dyspnea: Sudden gasping, severe respiratory difficulty, or cyanosis (blue discoloration).

Acute Stroke Signs (FAST): Sudden facial drooping, unilateral arm weakness, slurred speech, or confusion.

Consciousness Loss: Syncope, sudden collapse, unresponsiveness, or prolonged seizures.

CALL 108 EMERGENCY AMBULANCE

Direct ER Navigation & Trauma Center Map

Regulatory Scope Notice: CareConnect is a secondary & tertiary digital triage, consultation, and referral coordination tool, **not an emergency dispatch system**. Never wait for an online referral response in life-threatening scenarios.
